MIRABAI: VIRTUAL
Founder: Mirabai
Devi Foundation

Mirabai Devi is a globally acclaimed teacher and conduit for the Divine Feminine. She is a speaker, presenter, healer, medium, and emissary

WHY DO WE NEED THE CONSCIOUS LEADERSHIP AND ETHICS SUMMIT?

By **Brenda Kali**

BRENDA KALI
Founder: Conscious Companies

In an age where technology moves faster than wisdom, where algorithms shape societies before ethics can catch up, the need for the annual Conscious Leadership and Ethics Summit is no longer optional. It is imperative. It is a moral gathering point in a world accelerating toward chaos, creating a space where humanity can think deeply before technology thinks for us. It is also a call to action, inviting leaders back to

consciousness at a time when the world is being reshaped faster than its moral compass can respond.

Each year, the Summit focuses on a theme that reflects the world around us, setting into motion a global collective will, to build a better world, with the urgency that we currently require. In 2023, when ESG was the next best thing, our theme was **Science over Compliance**, where we raised our voices to ask the question: *“Does it take box to tick for leaders to do the right thing?”* Because when a leader is conscious ESG, ethics, and doing the right thing becomes part of their DNA, existing under the umbrella of conscious leadership.

2024 was an election year and our theme was **Truth or Dare** where we dared both politicians on the ballot paper and business leaders to tell the truth. We asked politicians a crucial question. *“Are you there to join a failed and corrupt political establishment in its looting frenzy, while appeasing your donors, or are you there because you care about this nation’s people, winning public trust, and wanting to make a meaningful difference?”*

We challenged and dared business leaders to look at themselves and experience that *truth within*, whatever that may be, and to reflect on how their actions affect and impact the lives and livelihood of others.

In 2025, our theme was from **Chaos to Consciousness**. Chaos is a dizzying dance of disruption. It is disorder and the breakdown of systems, structures, and stories that once made sense.

Today, the theme is **The Convergence of Technology, AI and Conscious Leadership**. We live in a time of extraordinary advancement. AI can now write, predict, diagnose, create, and influence. Corporations possess unprecedented power. Leadership decisions ripple across continents in seconds. Yet amid all this progress, humanity stands at a crossroads: because intelligence without consciousness is dangerous, and innovation without ethics can be destructive.

This summit exists because the world does not merely suffer from a crisis of technology, it suffers from a crisis of consciousness.

“ **Humanity will determine the future of AI; not by algorithms alone, but by the depth of consciousness from which we build them.** ”

This is where the Summit becomes a unique space where leaders pause long enough to ask themselves deeper questions on consciousness.

Because leadership that is unconscious has consequences. History has shown us that when power evolves faster than ethics, societies fracture. Trust erodes. Institutions collapse and we become data points rather than human beings. Without conscious leadership, AI could amplify bias, deepen inequality, manipulate truth and accelerate division at scales humanity has never witnessed before.

The summit therefore exists to ignite an awakening, where innovation meets morality, and where leaders are challenged to move beyond performative responsibility into profound accountability and service to humanity. The future is arriving faster than we imagined. The question is whether our consciousness will arrive in time.

SLAVEN GAJOVIĆ
CEO: Maximum Group

Further to Brenda’s advocacy on consciousness and leadership, Maximum Group embraces the Conscious Companies

movement and its way of doing business. We’re committed to advancing Brenda’s legacy into a for-profit model that proves profitability and purpose can coexist.

Our goal is to take Conscious Companies into every boardroom, making ethical, conscious leadership the standard of business worldwide. Guided by our motto and registered trademark, Profit While Doing Good™, we believe everyone can share in its benefits while creating value.

We look forward to welcoming you to many future, Conscious Companies events, so that together, we can do good for humanity as a whole.
